

## **InnerShare Corp Sample Reports & Descriptions**

InnerShare are continuously adding and updating the reports we provide in accordance with client requirements. This document contains a sample of the most popular reports available. Please contact our sales office to find out more about these reports and what others are available.

Page 2 of this document provides a summary description of each report alongside the page it can be found on.

If you have any questions regarding this report please call us on 1 604 675 6994 or by email [info@innershare.com](mailto:info@innershare.com).

## Report Descriptions and Page References

3. **Company Shareholder Overview**; graphically portrays the total shares of stock outstanding by category (restricted, NOBO, OBO and Regular Beneficial Shareholders (those who hold paper copies of their shares)).
4. **Share Register Analysis**; provides a breakdown of shareholders categories by the number of shares they own. The purpose of this report is to gain an understanding of the type of investors your company has attracted.
5. **Regional Report**; portrays shareholder dissemination across the globe and then a close up of the United States.
6. **Brokerage Report**; A breakdown of all brokers by percent of stock owned by their clients. InnerShare can provide this for NOBO data only.
7. **Shareholder Changes Report**; lists and portrays shareholder movement in four categories: new shareholders; shareholders who have liquidated; shareholders who have increased their positions; and shareholders who have decreased their positions.
8. **Regional Changes Report**; portrays the changes in geography of the shareholders and shares owned.
9. **Shareholder Analysis across all Periods**; is a time-trend chart for all the ADP NOBO lists a client provides to InnerShare. The Chart tracks two major areas; the total number of shareholders and the total number of they shares own. In our example the cause for changes in total number of shares may be from movement into and from OBO status and increase in dilution from exercised warrants and/or options.
10. **Shareholder Holdings across all Periods**; is a time-trend chart for the Share Register Analysis (see chart #2). This is a superb chart for tracking effectiveness of IR/PR programs, and to analyze changes in a Company's shareholder base. This chart is more effective when used with the previous chart "Shareholder Analysis across all Periods"
11. **Regional Report across All Periods**; Extending the tracking data even further, this report follows the geographic changes in ownership over the specified period.

**Pages 10, 11 & 12.**

Along with the summary reports listed above, InnerShare also provide lists of shareholders in certain categories. These lists may be the top sellers or buyers in a period or lists of new and liquidated shareholders between two dates.
